

Visitor Health Screening

The health and safety of our employees, customers, families and visitors is a priority for The Sugar Milling Research Institute NPC. As the coronavirus disease 2019 (COVID-19) outbreak continues to evolve and spread globally, the SMRI is monitoring the situation closely and will periodically update company guidance on current recommendations from the National Institute of Communicable Diseases and the World Health Organization.

To prevent the spread of COVID-19 and reduce the potential risk of exposure to our employees and visitors, we are conducting simple screening measures. Your participation is important to help us take such precautionary measures to protect you and everyone in this building. Thank you for your time.

Visitor Name: _____
